

HBN Project (continuation)

03 Sep - 10 Sep

(Infrastructure Problems)

- ① Eigen Vectors for Low ISC & High ISC graphs
- ② sLORETA & checked on Spectral cone
⇒ No difference from eLORETA
- ③ Source reconstruction Pipeline
Auditing → checks OK
- ④ corrcorr on 20k vertices
360 ROIs
- ⑤ literature check up on
"EEG, HBN, eLORETA, Inversion"
⇒ eLORETA seems OK but not so much for us
