HBN warmup project (S4B2)
Week 5&6 (06 May – 19 May)

Revival:

① Events added properly

② Raw data in time domain (plotly) after having removed the "noisy channels" (Nentwich paper)

③ Topo plot

New :

① PSD plots for occipital (electrodes)

② Source reconstruction using eLORETA (BEM)

③ Finding spectral density at source space

Thread I was looking to exploit:

☆ look the activity for different events and Check its activated regions plots

Next week:

①→

② Based on suggestions (Could open up new ideas to explore)

Optional workload (doubtful)

. . .
